

School of Educaiton & Health
Curriculum Committee

Minutes – April 29th 2020

In attendance via Google Hangout Meets: Jeff Cherubini (Chair), Elizabeth Kosky, Tracy Lahey, Kerri Mulqueen, Karen Nicholson (Ex Officio), Kayla Valentino

- Meeting called to order at 9:30am.
- Minutes were approved from March 25th 2020.
- The committee reviewed and discussed adding RHS 449 CT Procedures (3 credits) to the Nuclear Medicine Program (including both the bachelor degree and certificate). The course will replace the 3 credit general elective requirement for the bachelor degree students and would be an additional course for the certificate students. NMT students will be required to take this courses as part of their major requirements. Rationale includes allowing NMT students to be eligible to sit for the Computed Tomography certification through the American Registry of Radiology Technology (ARRT) and the potential for dual certification in Nuclear Medicine Technology (NMT) and Cat Scan (CT). Program completers would then be eligible for dual certification in NMT and CT. The committee unanimously approved the proposal.
- Meeting adjourned at 10:15am.
