## Elements to be included in a proposal of a new academic program

A proposal for a new academic program must include the following elements:

1. Description of the program
2. Rationale including:
a. Relation to Manhattan's commitment to a foundation in the liberal arts for all students
b. Relation to Manhattan's mission and goals
c. Credible market analysis supporting the enrollment projections assumed in margin forecasts, including clear articulation of target student audiences (e.g. Trad UG, Non-trad UG, grad, etc.)
d. Net surplus and margin (\$ and \%) forecasts going out 4 years generated using spreadsheets, as indicated below
3. Program of study for the new program, including all courses to be taken over the entire degree (including those outside the area of the program) and a proposed term-by-term schedule by which students would typically take those courses
4. Written acknowledgement by the chair of each department offering non-gen ed courses for the program of that department's ability and/or requirements to offer such courses
5. Spreadsheets containing revenue projections, all estimated costs associated with the program, and resulting forecasts of net surplus and margins to be generated by the program
