Hi Br Augustine,

I'm writing as a follow-up to our prior discussion about the proposed changes in the Biology majors curriculum whereby we wish to move towards 4-credit courses.

Will you (Bio secondary Ed) be able to adjust to this proposal? We would like to make a formal proposal to CCC soon and wish to confirm that there are no strong objections.

Thanks,

Mike

To: Michael Judge <michael.judge@manhattan.edu>

Michael,

Based on our first meeting, the ed. dept can adjust to the new proposal. I'm assuming that this would be in effect for the about half-way, when would you be presenting this for approval by the School of Science and the Curriculum Committee?

BA

Hi Br Augustine,

Thank you for your quick reply. You are properly concerned about the phase-in period.

I will seek final Science approval this month and then send to CCC. No relevant catalog changes have been submitted at this point.

If approved, we will need to have a phase-in period. First, it will have almost no immediate effect on the incoming Bio majors, because it only affects sophomore & above classes. I suspect that the wise choice will be to convert the 200-level classes in 2014-2015, 300-level the following year, etc

Yes, I would be happy to meet with you to find the right courses for the Bio-Ed students.

Mike
