Hi Jeff & Tom,

Biology will be proposing a change to our curriculum whereby a standard course in the major will be 3 hours of lecture + 3 hours of lab (4 credits total). The rationale and draft curriculum are attached.

Students in your program who take a majors course in our department at the 200 & above level will be affected. I would guess this would affect only a couple of students each year.

We understand that our proposal will need to pass the College Curriculum Committee and wish to seek approval by affected parties.

Do you have a strong objection to this proposal? If so, can we discuss to find a mutual solution?

Thanks,

Mike

Mike,

Thanks for sending me this. My one concern was whether or not the extra credit would incur an extra payment for students. I have been assured that a 16-credit semester would not incur such a fee.

So, we're okay with the changes.

I hope the changes go well for all concerned.

Tom

Hi Tom,

Thanks for the feedback. I'll update you as the proposal moves through various committees.

Best,

Mike
